

Just to let you know that at 6pm on Saturday 30 October I'll be taking part in 'Clang for Climate', a national action that's asking people to sound the alarm about climate breakdown ahead of the COP26 climate conference in Glasgow, by banging pots and pans from their doorsteps. This will last for 10 minutes, and I wanted you to know why it's happening. I hope this doesn't cause any distress to any members of your household.

There's more information on this here: [clangforclimate.org](https://clangforclimate.org)
